

ProGuard® is a line of pool care products specially created for commercial pools and service professionals. ProGuard supplies just what you need to keep your pools clear, inviting, and free from algae and bacteria growth – everything from algaecides to sanitisers to oxidisers to balancers to specialty products.

CLEVER STICKS PLUS - 20kg

- Pool sanitiser.
- 855g/kg available chlorine present as trichloroisocyanuric acid.
- Added chlorine protector.
- More gentle on vinyl liners and equipment.
- Does not cloud the water.
- Once-a-week maintenance.
- Easy to use with no need to pre-dissolve.
- Concentrated so you use less.
- Minimal impact on water balance.
- Stabilised chlorine compounds are not lost to the sun's UV rays.
- Designed for skimmer application.

TRICHLOR PLUS TABLETS - 20kg

- Pool sanitiser.
- 650g/kg available chlorine present as trichloroisocyanuric acid.
- Totally soluble, multifunctional 160g tablet.
- Built-in chlorine-tolerant clarifiers and water-enhancing agents.
- Can be used in floaters or feeders.
- Ensures sparkling clear pool water.
- Up to 20% less product required than comparable sanitisers.
- Less skin and eye irritation than many chlorinating products.
- Minimal impact on water balance.

TRICHLOR PLUS GRANULES - 20kg

- Pool sanitiser.
- 660g/kg available chlorine present as trichloroisocyanuric acid.
- Unique co-compacted granular product.
- Skimmer-fed application.
- Less skin and eye irritation than many chlorinating products.
- Easy to use with no need to pre-dissolve.
- Concentrated so you use less.
- Minimal impact on water balance.

STINGY STICKS - 20kg

- Pool sanitiser.
- 900g/kg available chlorine present as trichloroisocyanuric acid.
- pH of 1% solution = 2.9.
- Totally soluble, leaving no residual.
- Unique compression method produces a more dense stick.
- Stabilised chlorine compounds are not lost to the sun's UV rays.
- Does not cloud water
- Slow-dissolving for steady release of chlorinating compounds.
- Can be used in automatic feeders and floaters for constant chlorination.

DICHLOR GRANULES - 20kg

- Pool sanitiser.
- 560g/kg available chlorine present as sodium dichloroisocyanurate (dehydrate).
- pH of 1% solution = 6.0.
- Completely and instantly soluble, leaving no residual.
- Will not cloud water.
- Excellent for sanitising small above ground pools.
- Concentrated so you use less.
- Minimal impact on water balance.

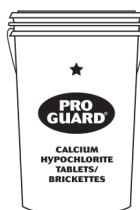

BROMINE TABLETS - 20kg

- Spa sanitiser.
- 650g/kg available Bromine and 280g/kg available Chlorine present as Bromochlorodimethylhydantoin (BCDMH).
- pH of 1% solution = 4.0
- Effective over a wider pH range than chlorine alone.
- Less odour and slower dissolving than chlorine tablets.
- Chlorine content of tablet serves to regenerate bromine.
- Ideal for indoor spas, and pools with attached spas because of reduced odours.

CALCIUM HYPOCHLORITE GRANULES - 40kg - AU ONLY

- Pool sanitiser.
- 700g/kg available chlorine (Cl) present as Calcium hypochlorite.
- pH of 1% solution = 11.8.
- Effective and economical sanitiser and oxidiser.
- Suitable when stabiliser is not permitted.

CALCIUM HYPOCHLORITE TABLETS/BRICKETTES - 20kg - AU ONLY

- Pool sanitiser.
- 70% Calcium Hypochlorite.
- 7gm tablet.
- Ideal for commercial pool applications.
- Suitable for use in Calcium Hypochlorite automatic feeders.

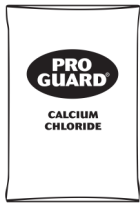

SODIUM BICARBONATE - 25kg

- Pool balancer.
- 1000g/kg sodium hydrogen carbonate (sodium bicarbonate).
- Raises Total Alkalinity.
- For all pool types.
- Protects the pH from being influenced by factors such as rain, swimmer load, and other chemical application.
- Prevents corrosion of equipment.
- Classified as a non-dangerous good*.

SODA ASH - 25kg

- Pool balancer.
- 1000g/kg sodium carbonate (dense soda ash).
- Raises pH.
- For all pool types.
- Prevents corrosion of equipment.
- Prevents etching of concrete and grout, and wrinkling of liners.
- Prevents eye irritation caused by low pH.
- Classified as a non-dangerous good*.

CALCIUM CHLORIDE - 25kg

- Pool balancer.
- 740g/kg calcium chloride.
- Soluble calcium hardness increaser.
- Granular formulation allows for faster dissolving.
- Less likely to cloud the water on application.
- No pre-dissolving.
- Prevents corrosion of equipment.
- Prevents etching of plaster and wrinkling of liners.
- Classified as a non-dangerous good*.

SODIUM BISULPHATE - 25kg

- Pool balancer.
- 1000g/kg sodium bisulphate.
- Lowers Total Alkalinity and pH.
- For all pool types.
- Prevents corrosion of equipment.
- Prevents etching of concrete and grout, and wrinkling of liners.
- Reduces the risk of scale formation.
- Easier to use than liquid acid (hydrochloric acid, muriatic acid).
- Better alternative than liquid acid.
- Classified as a non-dangerous good**.

CYANURIC ACID - 25kg

- Pool balancer.
- 1000g/kg cyanuric acid (CYA).
- Prevents chlorine loss due to sunlight.
- For use with chlorine systems only.
- Reduces chlorine consumption.
- Ideal for outdoor swimming pools.
- Classified as a non-dangerous good*.

SHOCK PLUS - 20kg

- Pool oxidiser.
- 372g/kg available chlorine present as sodium dichloroisocyanurate.
- pH of 1% solution = 6.7.
- Dissolves almost instantly and is totally soluble.
- Destroys chloramines and musty odours.
- Clarifying agents aid the filter in removing small suspended particles.
- Allows swimmers back into the water after an hour.

ALGIRID - 5L

- Pool algacide.
- 400g/L benzalkonium chloride.
- Powerful wetting agent.
- Stable in sunlight and will not evaporate.
- Prevents a wide spectrum of algae growth.
- Helps repel ducks and insects.
- Negligible effect on water balance.

DUAL ALGAECIDE - 5L

- Pool algacide.
- 40% copper active as patented copper polyacrylate molecule.
- Unique non-staining formula.
- Withstands up to 50 ppm of chlorine.
- Contains metal chelating products.
- Built in water clarifiers.
- Effective against all common and mutant strains of algae.
- Long lasting algae prevention.
- Results can be seen in 24 hours.

CLARIFIER - 5L

- Specialty product.
- Specially formulated liquid polymer blend.
- Contains no alum.
- Does not affect pH.
- Highly concentrated, yet does not require dilution.
- Safe for all pool and filter types.
- Classified as a Non-Dangerous Good*.
- Water is restored to sparkling.
- Excellent as a problem solver for cloudy pools where chlorine demand is not an issue.

SUPER CLARIFYING TABLETS - 9kg

- Specialty product.
- Cationic polymeric flocculant.
- Unique 60g clarifying tablets.
- Built-in water enhancing agents.
- Skimmer application.
- Compatible with all types of filtration systems.
- Non-toxic.
- Classified as a Non-Dangerous Good*.
- Promotes excellent water clarity.
- Enhances filtration.
- Improves sanitiser effectiveness.

PHOSPHATE REMOVER - 5L

- Specialty product.
- 150g/L Lanthanum chloride.
- Prevents algae growth by removing phosphates, a major food source for algae.
- Negligible effect on water balance.
- Useful for pools exposed to phosphate-rich environments, such as swimming pets, birds, heavy rain, garden beds, floods, dust storms, areas with a lot of trees, country areas.
- Classified as a Non-Dangerous Good*.
- Pool sanitisation becomes more efficient against green pools.
- Can be used as maintenance preventative or problem solver.

STAIN & SCALE REMOVER - 5L

- Specialty product.
- Contains 2-Phosphonobutane-1,2,4-tricarboxylic Acid.
- Liquid sequestering agent.
- Prevents formation of crystalline calcium, magnesium and water hardness ions.
- Helps remove scale build-up.
- Helps prevent serious damage to pool surface and equipment.
- Helps to remove and prevent stains.

*Classified as Non Dangerous Goods according to the Australian Dangerous Goods Code 7.8th Ed.

**This product is not a Class 8 according to UN Test Methods.
